

# Termoset Manufacturing Plant

BARCELONA / SPAIN

# SHORT COMPANY

## OVERVIEW

Combakett has been developing an intense activity in the industrial sector of technical plastics for more than three decades, **manufacturing thermoset and thermoplastic parts**, with important clients in sectors such as automotive, electrical, electronics, household items, etc.

**We have extensive experience manufacturing plastic parts that withstand high temperatures of +300C°.**

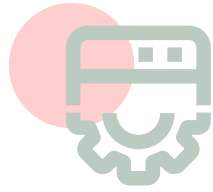

# INDUSTRIAL DIVISION B2B

## WHAT WE DO

We manufacture different types of plastic parts, specialising in thermosetting parts whose technical materials: PF, UFS, MF, Ups and SMC have excellent thermal, electrical, mechanical and dimensional stability characteristics.

Our international vision, dynamism and flexibility, has led our products to be present in the domestic market and also in foreign markets such as USA, France, Italy, Germany, Switzerland ...

## INDUSTRIAL DIVISION B2B

**Design and manufacture of thermosetting** and thermoplastic parts.

**Technology:** compression, transfer and injection.

**Main sectors:** automotive, household goods, electrical, electronics etc.

**Quality** assurance is carried out by means of an integrated management system and the application of control and analysis techniques, in accordance with the ISO 9002 standard.

### EQUIPMENT

- Crammer Presses
- Hydraulic Presses from 100 to 200 tn.
- Injection Presses from 125 to 200 tn.
- Shot blasting machines, tumblers and finishing vibrators.
- Various high frequency auxiliary machinery, peripheral equipment, pneumatics and general finishing and assembly tools.

INDUSTRIAL DIVISION B2B

## HOW WE DO IT

### COMPRESSION, TRANSFER AND INJECTION

Having **3 transformation technologies**: compression, transfer and injection, **allows us to offer the most suitable solution** to our customers depending on the specifications of the part to be manufactured.

All the products manufactured by Combakett **comply with the different international standards** (Reach, Rohs, CE Regulations, Ecoembes SIG Green Dot, etc.).

### Other products manufactured by Combakett

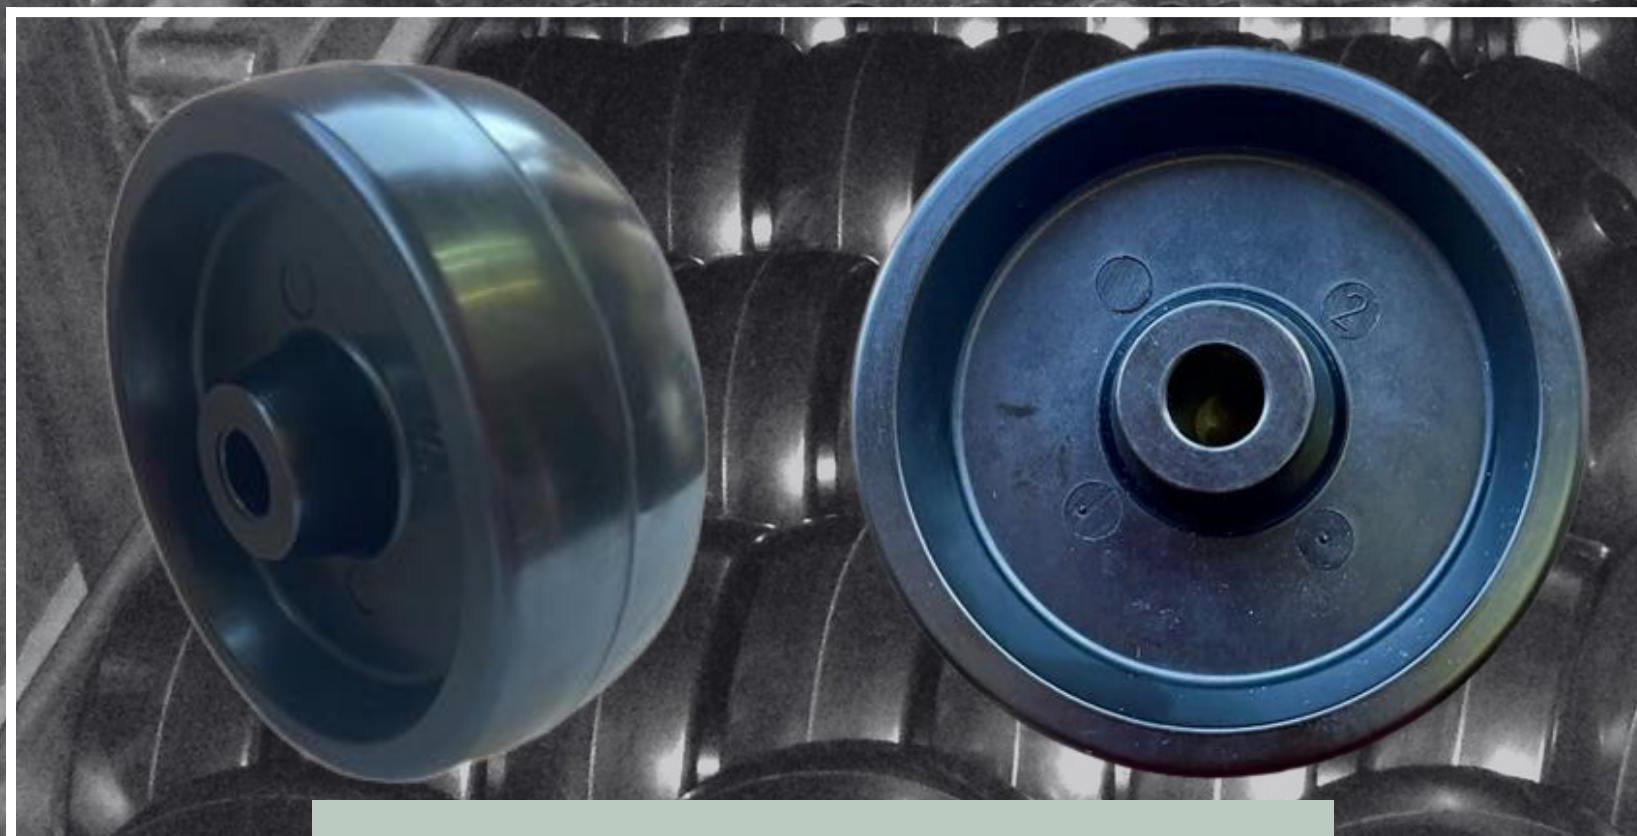

| SMC bar support and strips for nuclear power plants | Design ashtrays | Ergonomic and design kitchen utensils : vegetable peelers, plates... | Engine terminal plates and pistons | Knobs, handles and handles for cookware | Wheels for oven trolleys with high temperature resistance | Brush holders and other automotive components | Lamp housings and lamp holders |

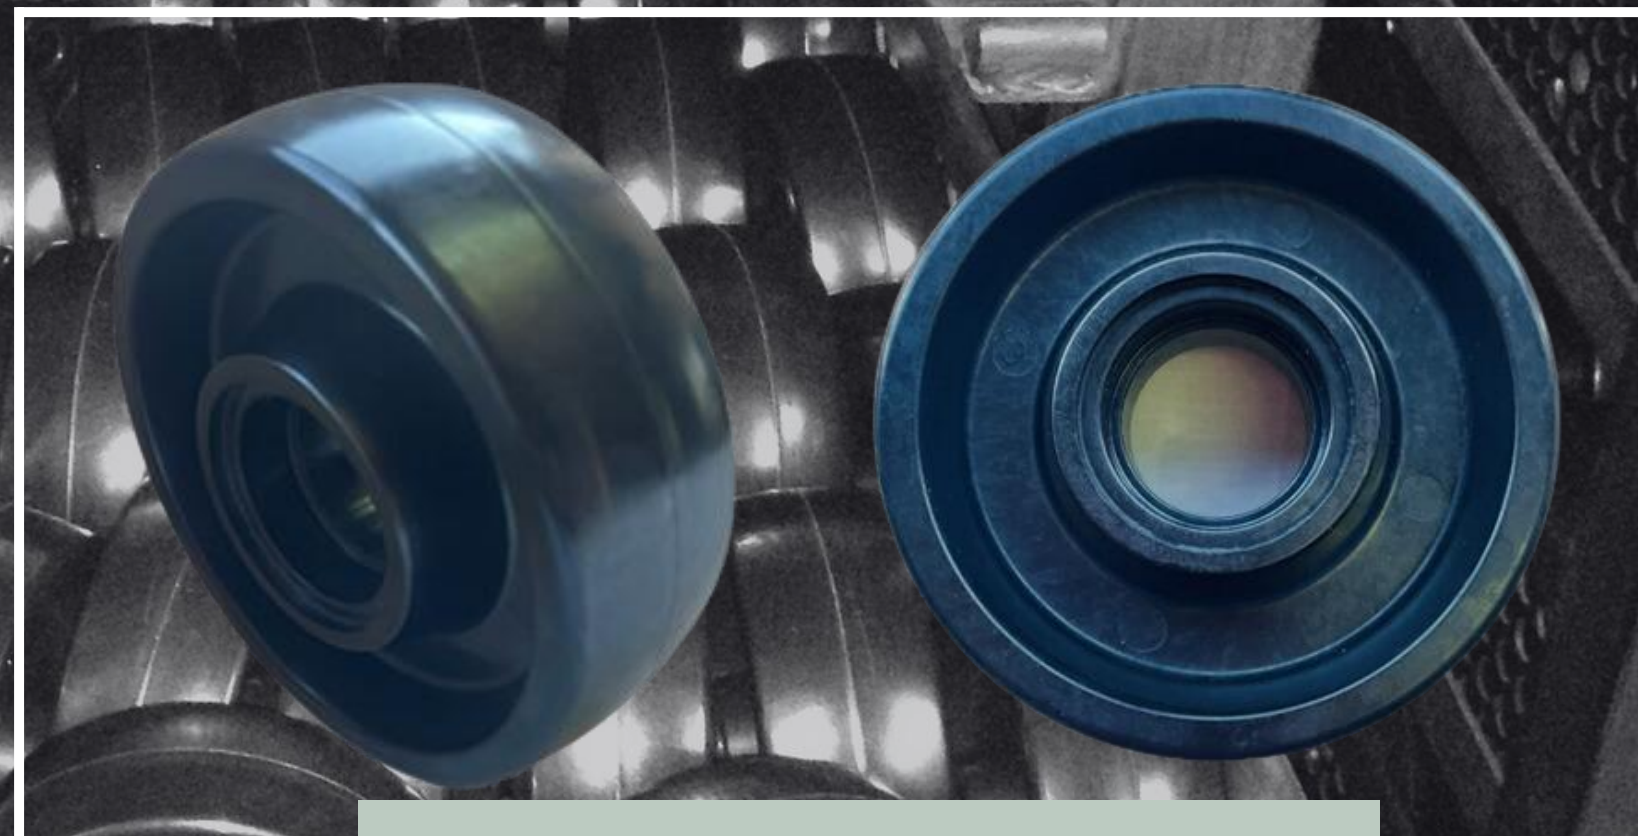

HOW WE DO IT

# WE HAVE OUR OWN KNOW-HOW IN MANUFACTURING PARTS THAT WITHSTAND +300C°

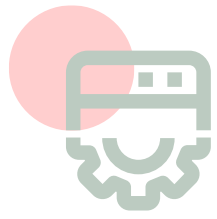

Among other applications, we manufacture wheels for trolleys that go into bakery ovens. With the same know-how, we also manufacture knobs and handles that can withstand high temperatures for high-quality kitchenware.

PHENOLIC RESIN WHEEL  
CTT 100 - 590021001

## Difusor

AMBICAR

- Es un elegante y discreto ambientador para el coche que encaja perfectamente en el interior del vehículo en la conexión de 12 V.
- Universal y fabricado con material ignífugo para ofrecer una larga durabilidad y resistencia.
- Es recargable y muy fácil de colocar. Sus dos compartimentos de recarga permiten personalizar el aroma con dos tipos diferentes de cápsulas aromáticas.
- Una de las ventajas de tener un difusor de fragancia sólida en el coche es que evita que se derrame o manche la tapicería como puede ocurrir si se utilizan ambientadores líquidos.
